

### California Median Asset Size By Institution Year-End 2016

## California Credit Unions

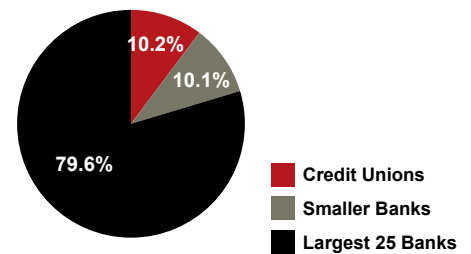

Number of credit unions headquartered in the state: 328  
Memberships in credit unions headquartered in the state: 10,981,450

### A small but significant presence in the community

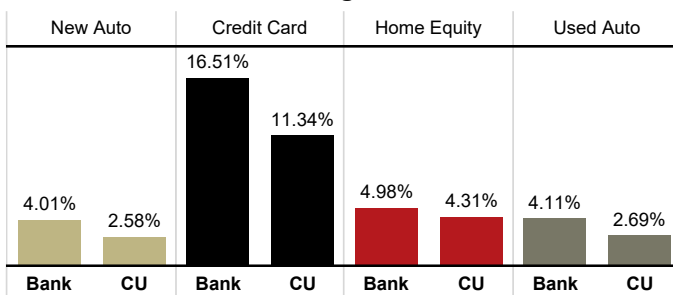

Credit unions represent a growing, but small segment of the state's financial sector. Banks control 89.8% of deposits in California. Big banks have aggressively expanded market share in the state and represent the biggest competitive challenge to the state's small institutions.

Out-of-state banks control 54.5% of total bank deposits in the state - a share that has increased by 42.9 percentage points over the past two decades.

### California Mid-Year 2016 Market Share of Deposits

### California Average Interest Rates

### A structural difference that produces big benefits

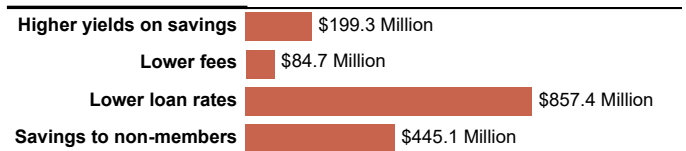

Credit unions are not-for-profit financial cooperatives and, unlike banks, have no shareholders demanding a market return on their investment. This structural difference allows credit unions to pass profits on to their member-depositors in the form of lower loan interest rates, higher yields on savings and fewer/lower fees.

### A better deal for consumers

The lower credit union average new car loan rate shown in the graph results in a savings of \$954 over the life of a 5-year car loan (assuming an average \$30,000 amount financed).

### 2016 California Credit Union Financial Benefits

Benefits arise from Credit Unions providing:

**Total Member Benefits \$1,141 Million**
