Texas Credit Unions

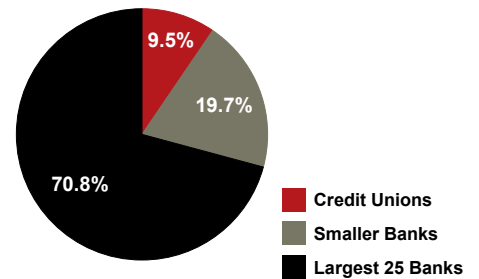

Number of credit unions headquartered in the state: 475
Memberships in credit unions headquartered in the state: 8,380,417

A small but significant presence in the community

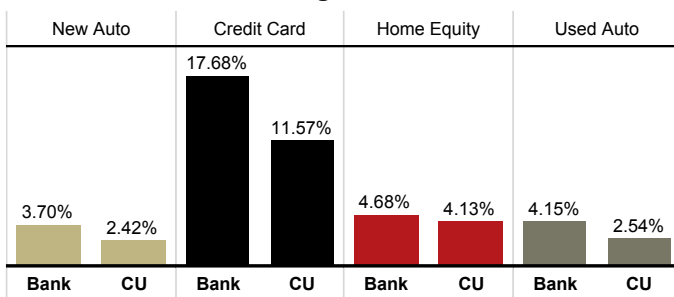

Credit unions represent a growing, but small segment of the state's financial sector. Banks control 90.5% of deposits in Texas. Big banks have aggressively expanded market share in the state and represent the biggest competitive challenge to the state's small institutions.

Out-of-state banks control 52.1% of total bank deposits in the state - a share that has increased by 9.8 percentage points over the past two decades.

Texas Mid-Year 2016 Market Share of Deposits

Texas Average Interest Rates

A better deal for consumers

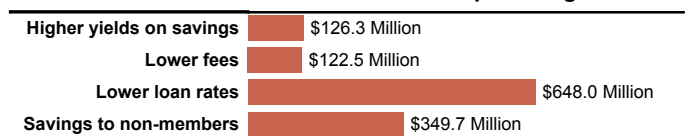

The lower credit union average new car loan rate shown in the graph results in a savings of \$855 over the life of a 5-year car loan (assuming an average \$30,000 amount financed).

A structural difference that produces big benefits

Credit unions are not-for-profit financial cooperatives and, unlike banks, have no shareholders demanding a market return on their investment. This structural difference allows credit unions to pass profits on to their member-depositors in the form of lower loan interest rates, higher yields on savings and fewer/lower fees.

**2016 Texas Credit Union
Financial Benefits**

Benefits arise from Credit Unions providing:

Total Member Benefits \$897 Million
