Retire Your Way

An individual retirement account (IRA) offers you a way to hold on to more of your earnings now and have them work for your future.

If you meet the requirements, you can deduct your contribution from your taxable earnings, saving on your income taxes. As your account grows, taxes on the money you're earning are deferred until you withdraw the funds.

With a credit union IRA, you can invest your money in a variety of savings and investments such as CDs (share certificates), and mutual funds.
