

Lock Down Your Smartphone

Protect the personal information on your smartphone or mobile device from pickpockets and cybercriminals.

*Thank You
for Using the Credit Union*

Protect the Data on Your Mobile Devices

- Turn on the passcode option and sign up for remote data erasing in the event your phone is lost or stolen.
- Download apps only from a trusted source to ensure they are free of malware.
- Use a password management app rather than storing account access information in contacts or memos.
- Access financial accounts through secure, private networks. Free, public networks are vulnerable to cybercriminals.
