\* Beginning in June 2004 there is a break in this series. Prior to June 2004 adjustable mortgages were defined as those that called for a periodic interest rate adjustment. In 2004 and thereafter we define adjustable mortgages to also include balloon/hybrid mortgages that adjust in five years or less. Balloons/hybrids of this type were not separately reported on call reports prior to June 2004 so some were likely reported as fixed mortgages and some as adjustable.

(1) Other checkable deposits+consumer-held demand deposits(est)+regular savings+small time deposits(incl IRAs)+MMDAs+non-institutional MMMFs+Savings Bonds (\$billions).

(2) Shares do not equal 100% since savings market includes non-institutional MMMFs and Savings Bonds.

(3) Savings institutions includes Savings and Loan Associations and Mutual Savings Banks.

(4) Some credit unions sweep share draft balances weekly to reduce reserve requirements.

This causes a distortion (i.e. total share draft balances appear smaller than they otherwise would be) in months ending on Friday.
